

1st OSMOSIS INTERNATIONAL EVENT

Trends and R&D opportunities for the security technology supply chain

June 15th 2011, Finmeccanica Group Services, Via Piemonte 60, Rome, Italy

The security market has been growing dramatically over the last decades. It has been expanding in terms of services, products and research activities offered. Nowadays, the security market is a multi-facet domain that encompasses disparate areas, from the security of Critical infrastructure to the security of large events. Large Enterprises (LEs) as well as Small Medium Enterprises (SMEs) seek and exploit opportunities that lay untaken on this growing market. LEs, by their nature, cover a predominant role while SMEs have to face obstacles in entering the supply chain even though they are fully qualified to bring expertise and innovation in this market. This distance between LEs and SMEs is a hampering factor that hinders the potential benefits related to a joint collaboration between these enterprises. Here, the OSMOSIS project, *Overcoming Security Market Obstacles for SMEs Involvement in the technological Supply Chain* come into play. This workshop aims first to show OSMOSIS project results, areas of activity and to foster collaboration between European LEs and SMEs on Security Research Topics.

MORNING	Theme	Speaker
09:30 - 10:00	Registration	
10:00 - 10:10	Welcome	SESM (Italy)
10:10 - 10:25	The OSMOSIS project	CTECH (Italy)
10:25 - 10:45	The security market technology supply chain trends	TUM (Germany)
10:45 - 11:05	OSMOSIS results on Infrastructure protection security area	Honeywell (Czech Republic)
11:05 - 11:30	Coffee break	
11:30 - 11:45	OSMOSIS results on Large events security area	SESM (Italy)
11:45 - 12:00	OSMOSIS results on on Emergency Response security area	GMV (Portugal)
12:00 - 12:15	Success case of OSMOSIS project	INNEN
12:15 - 12:30	SEREN the FP7 network of NCP in Security	Monique BOSSI (APRE)
12:30 - 13:45	Light lunch	
AFTERNOON	Workshop: presentation of project ideas and discussion about FP7 opportunities	Moderator/Speaker
13:45 - 14:00	FP7 funding opportunities for security related projects	TBD
14:00 - 16:00	Other actors (University, research centers, LO) project ideas: 5/10 min presentation of project idea per org.	Finmeccanica + OSMOSIS
	SMEs project ideas: 5/10 min presentation of project idea per organisation	
Speed dating: networking between the participating organisations
